

KOTEBAT

 **Tecnodeck®**

EN

Tecnodeck started its activity back in 2004 and today is one of the leading companies in Europe on the WPC-Wood Plastic Composite materials.

Tecnodeck is also the brand of a complete deck system and architectonic profiles, manufactured in this innovative material.

Tecnodeck is manufactured using a sophisticated technology, which mostly combines selected particles of wood, encapsulated with thermoplastic. It combines the nobleness of wood with the resistance of thermoplastic.

With excellent resistance to atmospheric agents, Tecnodeck looks like natural wood, but does not requires the traditional and expensive treatments with oil and immunizing agents.

By using recycled wood particles, Tecnodeck is also the socially responsible option to the environment. Tecnodeck is used alternatively to exotic wood, undoubtedly contributing to protect the remaining rainforest.

Tecnodeck offers a material of recognized qualities: virtually without any maintenance, excellent resistance to atmospheric agents and directly contributing to preserve natural resources.

Tecnodeck is one of the few companies to hold the CE Marking - ETA 13/0439 (decking use).

Tecnodeck meets the requirements of the tests for flooring, by the German Institute TÜV Rheinland, report NR 21136167001 of 06/05/2008.

FR

Tecnodeck, conçu et développé en Europe en 2004, est une des références européennes dans la terrasse composite bois-thermoplastique.

Issu de la combinaison du bois et d'un matériau thermoplastique, Tecnodeck est un bois composite offrant le meilleur des deux matériaux. Le toucher et l'apparence unique du bois et la résistance hors pair des thermoplastiques.

Il est très résistant aux agents atmosphériques (soleil, pluie, humidité et même l'eau de mer) et ne nécessite aucun traitement particulier. Il ne craint ni les champignons ni l'usure!

Alliant particules de bois issues de l'industrie de transformation et thermoplastique (NON PVC), Tecnodeck est le fruit d'une technologie avancée qui permet d'optimiser l'utilisation des ressources.

Recyclable et ne contenant aucun produit toxique pour l'environnement, Tecnodeck est le choix écologiquement responsable.

Conforme à la réglementation européenne avec le Marquage CE - ETA 13/0439 (terrasse extérieure).

Tecnodeck a été testé et approuvé par l'Institut Allemand TÜV Rheinland, rapport d'essai N° 21136167001 du 06/05/2008.

THE NOBILITY OF WOOD

Combining the properties of wood and thermoplastic resins, Tecnodeck is a composite material that brings the best of each material: the unique touch of wood and the incomparable longevity of thermoplastics.

THE RESISTANCE OF THE THERMOPLASTIC

HIGHLY RESISTANT:

To sun, rain, fungi and insects - No need for protecting oils, paints or other maintenance products.

TO WEAR:

No splinters, user-safe and resistant for the specified use.

TO HUMIDITY, SALT WATER:

It does not warp or rot and is resistant to sea-water or pool-water.

With the touch and appearance of natural wood, with regular cleaning, it looks the same over the years.

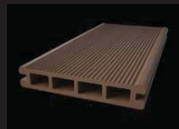

QUICKLY ASSEMBLED, ENJOY IT OVER THE YEARS

The Tecnodeck decking boards are exclusively designed for pedestrian use, in private and commercial applications of medium intensity. The assembly system with stainless steel clips provides an easy, precise and quick assembly.

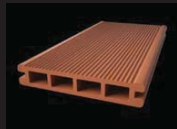

Ask for the installation instructions.

DECKING BOARDS COLORS

The colours shown in the photos may not exactly match the original colours of the decking material. Due to their nature, slight variations in colour may be possible from board to board.

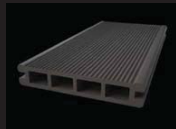

TROPICAL BROWN

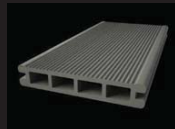

COLORADO RED

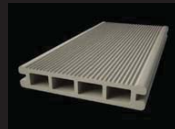

SAND BROWN

VULCANO BLACK

URBAN GREY

WHITE SHADE

ENVIRONMENT FRIENDLY

TROPICAL RAIN FORESTS ARE UNDER ENORMOUS STRESS. IT IS UP TO US TO INSURE THAT THEY SURVIVE.

Combining carefully selected wood particles from the wood processing industries, with thermoplastic materials (does not contain PVC), Tecnodeck is the result of advanced technology, allowing and excellent use of resources. By avoiding the use of any toxic material and being completely recyclable, Tecnodeck is the environmentally responsible option.

ARE WOOD PLASTIC COMPOSITES ALL THE SAME?

TECNODECK PRESENTS:

- > Absorption of UV (ultraviolet) rays - colour stability and material longevity.
- > Absorption of dampness of 0.3 (24h-immersion) - Dimensional stability.
- > Anti-bacterial - elimination of most bacteria and fungi.
- > Anti-sliding - complies with and excels DIN 4843 PART 100.
- > Outstanding temperature range for use - tested for use in negative temperatures (up to -40°C).
- > Does not contain PVC or other hazardous materials to the environment.
- > Tecnodeck has a unique aesthetic design that is appreciated by architects and designers.
- > Tecnodeck is a pioneering brand in Europe (2004), with numerous projects carried out, which confirm its quality, capacity and competency.
- > Tecnodeck presents its last generation of composite deck (4th generation), which is constantly evolving.
- > Tecnodeck was tested and approved by the German Institute TÜV RHEINLAND, test report N°. 21136167001 of 06/05/2008.
- > CE MARKING ETA 13/0439.

NOBLE COMME LE BOIS

Issu de la combinaison du bois et d'un matériau thermoplastique, Tecnodeck est un bois composite offrant le meilleur des deux matériaux: le toucher et l'apparence uniques du bois et la résistance hors pair des thermoplastiques. Développé en Europe, Tecnodeck est un produit Decksolutions.

LA RÉSISTANCE DU THERMOPLASTIQUE

HAUTE RÉSISTANCE:

Au soleil, à la pluie, aux champignons et aux insectes - Ne nécessite aucune huile, peinture ou autres produits d'entretien.

À L'USURE:

Aucune écharde, sûr pour l'utilisateur et résistant à l'usage spécifique.

À L'HUMIDITÉ ET MÊME À L'EAU DE MER:

Ne se déforme pas, ne pourrit pas. Résistant à l'eau de mer ou de piscine.

Bous naturel au toucher et à l'aspect,

Un nettoyage régulier suffit à entretenir son apparence au fil du temps.

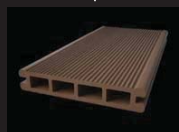

MONTÉ EN UN TOURNEMAIN, PROFITEZ-EN AU FIL DU TEMPS

Les lames Tecnodeck ont été exclusivement conçues pour un usage piétonnier en environnement privé ou commercial au passage modéré. Le montage à l'aide de clips en acier inoxydable est facile, rapide et précis.

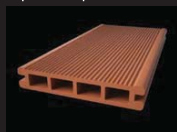

Demandez et suivez toujours les instructions de montage.

GAMME DE 6 COLORIS

Les coloris figurant sur les photos peuvent ne pas être exactement identiques à la couleur originale du matériau. De par leur nature, il est possible que la couleur varie légèrement d'une lame à l'autre.

POUR LE BIEN DE L'ENVIRONNEMENT

LES FORÊTS TROPICALES SONT EN EXTINCTION. C'EST À NOUS DE VEILLER À LEUR SURVIE.

Alliant particules de bois sélectionnés et issu de l'industrie de transformation et thermoplastique (non PVC), Tecnodeck est le fruit d'une technologie avancée qui permet d'optimiser l'utilisation des ressources. Recyclable et ne contenant aucun produit toxique pour l'environnement, Tecnodeck est le choix écologiquement responsable.

LES LAMES COMPOSITES SONT-ELLES TOUTES LES MÊMES?

TECNODECK PRÉSENTE:

- > Absorbe les rayons UV (ultraviolets) - stabilité des couleurs et longévité du matériau.
- > Absorbe l'humidité de 0,3 (24 heures d'immersion) - Stabilité dimensionnelle.
- > Est antibactérien - élimination de la plupart des bactéries et des champignons.
- > Est antidérapant - respecte et excelle au test DIN 4843 PART 100.
- > Offre une excellente amplitude thermique d'utilisation - testé à des températures négatives (jusqu'à -40°C).
- > Ne contient ni PVC ni aucun autre matériau nocif pour l'environnement.
- > Présente une esthétique unique appréciée par les architectes et les designers.
- > Est une marque pionnière en Europe (2004). Les innombrables projets réalisés attestent de sa qualité, de sa renommée.
- > Présente la dernière génération de lame composite (4ème génération) en constante évolution.
- > A été testé et approuvé par l'Institut Allemand TÜV RHEINLAND, rapport d'essai N°. 21136167001 of 06/05/2008.
- > Conformité CE-ETA 13/0439.
